SUMMARY

Senior Software Engineer with 6+ years of experience designing and delivering scalable backend systems, distributed infrastructure, and cloud-native architectures. Proven track record across fintech, edtech, and blockchain domains, with deep expertise in Go, PHP/Laravel, Node.js Frameworks, Python, Kafka, and distributed storage systems. Strong background in DevOps, CI/CD pipelines, system design, and API development. Non-stop learning and exploration enthusiast.

EXPERIENCE

Senior Software Engineer

Aug 2024 – Present

Foodics — Restaurant Management SaaS (Series C, KSA)

New Cairo, Egypt

- Designed and shipped Table Layout and Reservations features for Foodics Black (fine dining POS), directly enabling onboarding of 2 major enterprise restaurant groups.
- Led backend design and implementation of online payment expansion outside KSA across Foodics RMS and Pay At Table, supporting 2 new markets and anticipated 20% revenue increase.
- Architected WebSocket communication layer between Foodics RMS and POS devices, reducing order finality latency by 100% and improving real-time UX at scale.
- Replaced a single-point-of-failure queue storage system with a distributed, replicated system with active failure recovery, eliminating major incidents on high load.
- Eliminated 100% of CircleCI costs by migrating all CI/CD pipelines to GitHub Actions.
- Mitigated database outages from heavy push notification batch jobs on Foodics Online by redesigning the notification pipeline, achieving zero incidents post-deployment.
- Integrated Sentry error monitoring across 20+ Laravel microservices, improving observability and reducing mean time to resolution (MTTR).

Senior Software Engineer (Hour-based Contract)

Nov 2025 – Present

vyzn — AI-powered Construction Project Management Platform

Zurich, Switzerland (Remote)

- Optimizing reporting performance on the Vyzn DBS Contech Platform, improving query response times for large-scale construction project datasets.

Senior Software Engineer

Sep 2022 – Sep 2024

Züs — Blockchain-based Decentralised Storage (USA Startup)

Cupertino, CA, USA (Remote)

- Designed and implemented file permissions system enabling secure NFT hosting on a decentralised storage platform serving 3k+ users.
- Refactored historical data pipeline, optimizing storage and SQL/NoSQL queries across millions of rows, reducing query latency by 100%.
- Designed and implemented event sourcing from the blockchain network to client-facing REST APIs using Apache Kafka; delivered a working end-to-end POC.
- Led development of end-to-end supervised integration testing suite covering all failure and recovery scenarios across distributed system nodes.
- Improved storage node throughput by migrating from Apache Cassandra to RocksDB, reducing read/write latency by 500%.

Senior Software Engineer (Freelance)

Dec 2022 – Aug 2024

ENTLAQA E-Learning Solutions — Digital Transformation Agency

UAE (Remote)

- Built Laravel-based LMS for Egypt Entrepreneurship and Innovation Centre (EEIC), supporting 61k+ learners.
- Built the backend of a session-based internal employee training platform for a Major Holding Corporate in Yemen, serving over 50k employees, including life sessions support and AI-assisted Q&A.
- Integrated Apache Keycloak as a unified IAM and SSO solution across all EEIC subsystems, standardising user management and access control.
- Built a Reporting System for employee internal knowledge growth metrics for a Major Holding Corporate in Yemen.

Back End Developer (Freelance)

Aug 2022 – Jan 2024

Toptal — Top 1% Engineering Talent Network

Remote

- Delivered two core backend features for miBaby GmbH's CakePHP ERP system (Germany's leading baby products platform).
- Added unit and end-to-end test coverage to Super, a UK-based crypto payment startup, improving reliability and deployment confidence.

Software Engineer

Feb 2020 – Nov 2022

ZINAD IT

Egypt

- Contributed to the development and maintenance of a large-scale cybersecurity awareness learning management system, serving enterprise clients and government entities across KSA, UAE, and Egypt.
- Developed internal developer tools that helped save around 10% daily developer hours.

COMMUNITY

- Run a dev.to technical blog with 2,000+ views on 3 articles about AWS Aurora.

EDUCATION

Cairo University

2018 – 2022

Bachelor of Science, Computer Engineering

Cairo, Egypt

SKILLS

Languages: PHP, JavaScript, TypeScript, Python, Go, SQL

Frameworks & Libraries: Laravel, Node.js, CakePHP, AngularJS, OpenAI API, NestJS

Databases: MySQL, PostgreSQL, Redis, RocksDB, Apache Cassandra

Infrastructure & DevOps: Docker, GitHub Actions, CircleCI, Apache Kafka, Apache Keycloak, Sentry, Linux, Datadog

Architecture & Practices: Microservices, REST API Design, Event Sourcing, Distributed Systems, System Design, CI/CD, WebSocket, Agile

Cloud: AWS EC2, AWS ElastiCache, AWS Aurora MySQL, AWS CloudWatch, Microsoft Azure VM, Microsoft Azure Flexible MySQL Server, Azure CLI
